Every interaction, contribution,
and shared moment intrinsic value.
It is time we measure what
actually matters.

Transactional Systems:
Overlooking the Human Element.

Intrinsic Value:
Unrecorded and Unmeasured.

Introducing Social Tool Kit (STK)

Platform: Android Application
(Currently in development).

Audience: Designed for everyone
aged 13 and above.

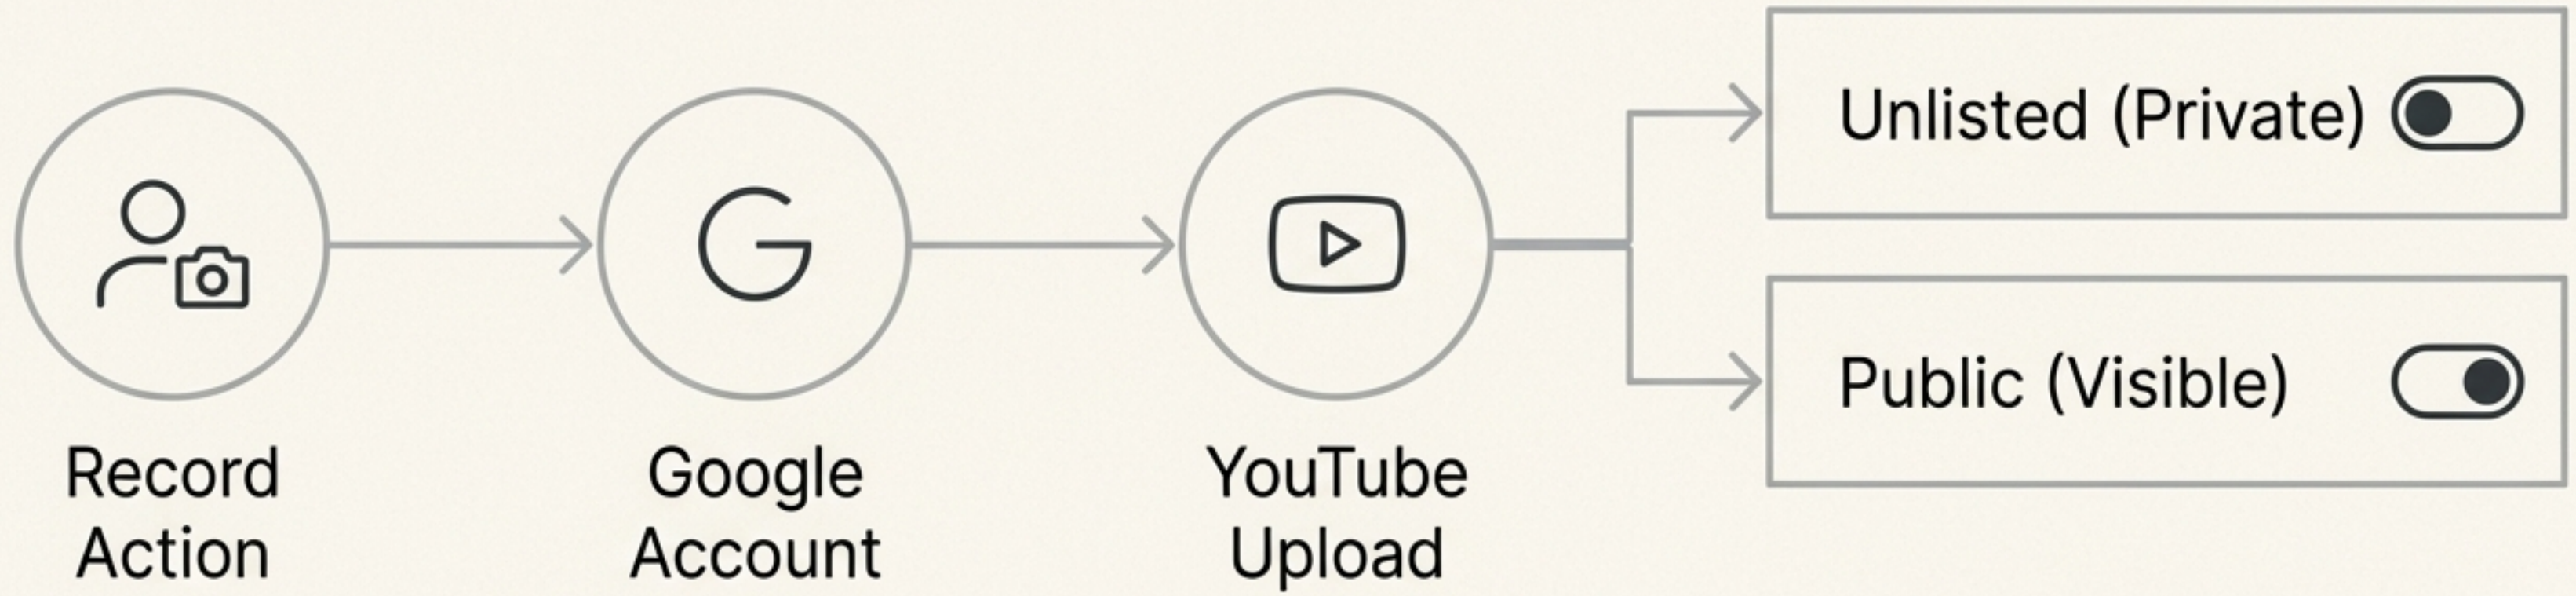

Purpose: See yourself through
the eyes of others.

Universal values, not competition.

Impacting humans, animals,
and nature.

Growing into someone who
cares and contributes.

Solo Actions: Show Your Impact

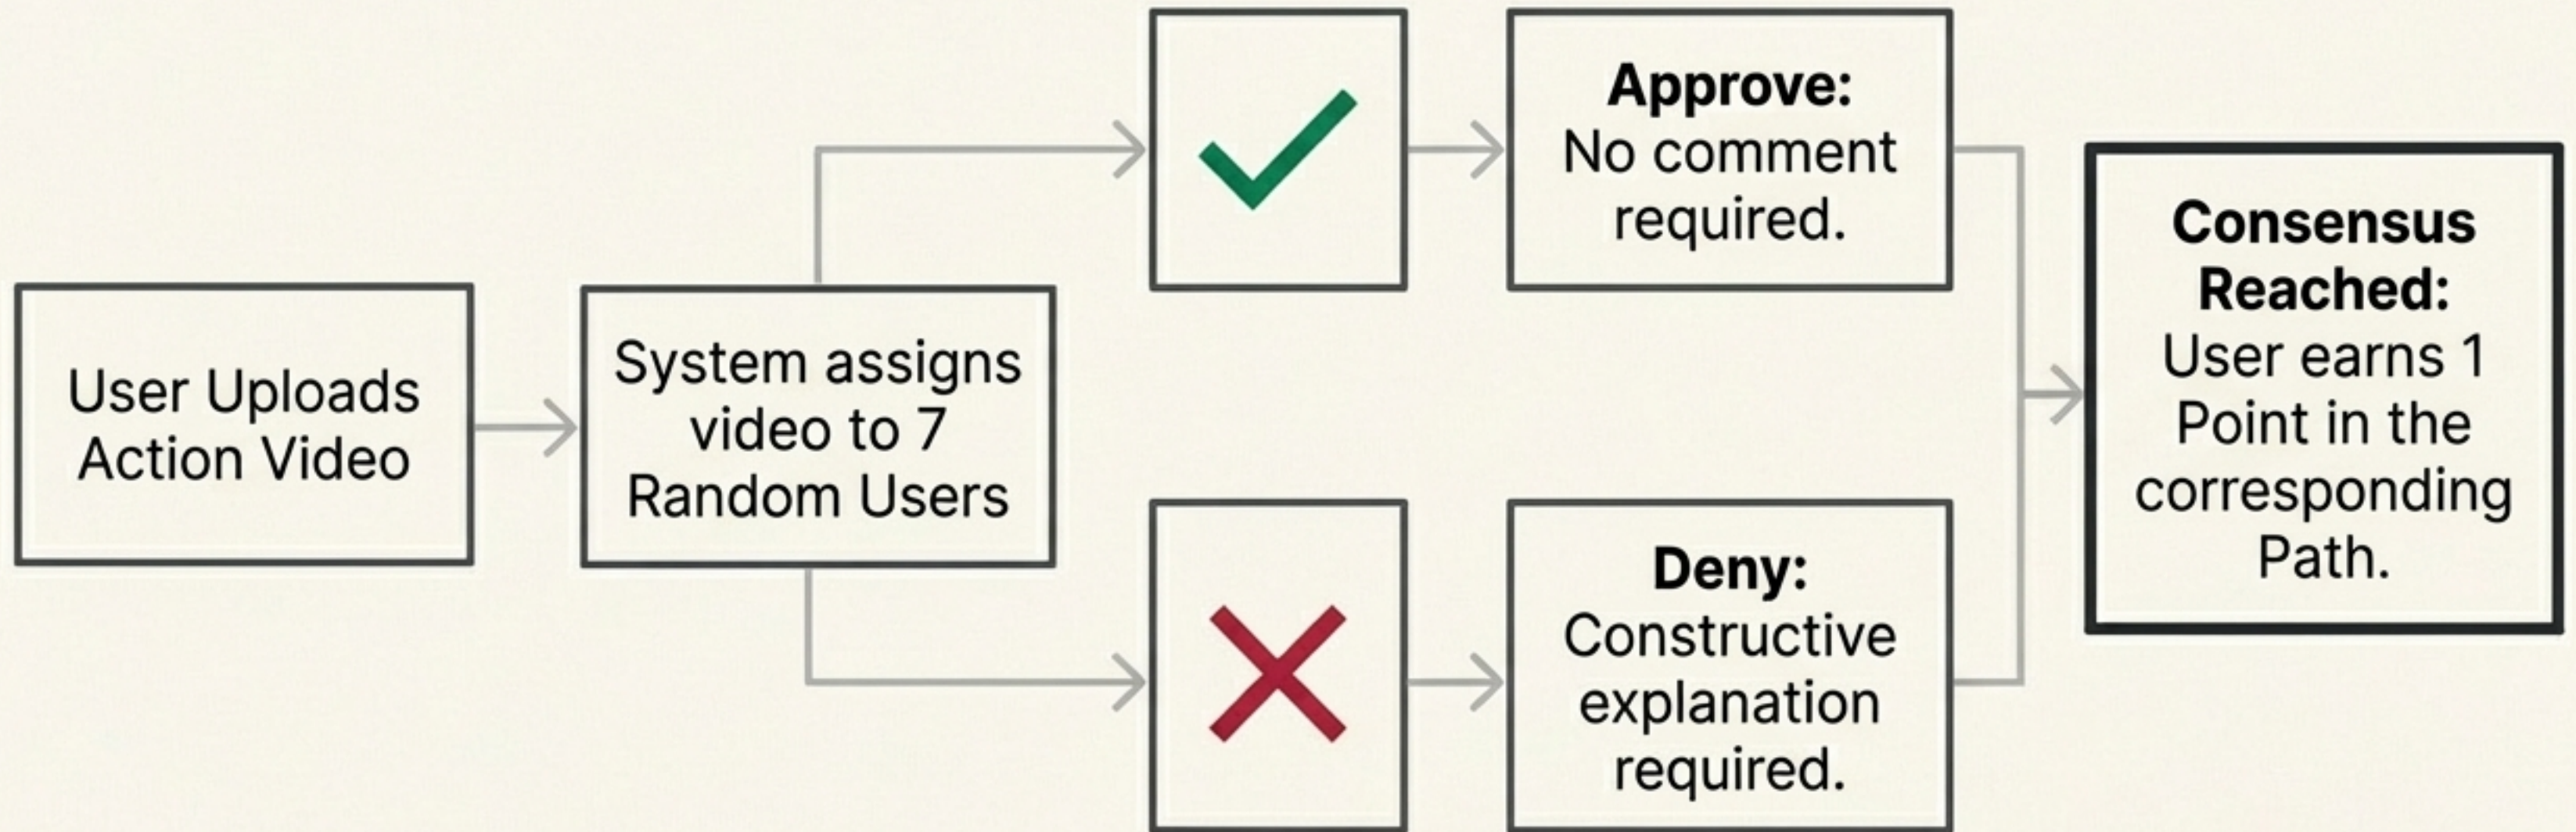

Accessible Architecture:
STK requires only a standard Google account.

Familiar Tools: Record positive actions on your phone and upload via YouTube.

Total Privacy Control:
Your data, your choice.
Toggle between Unlisted or Public visibility.

The 7-User Validation Protocol

Uncapped growth—grow your profile as much as you want based on peer consensus.

Your Unique Colour Identity

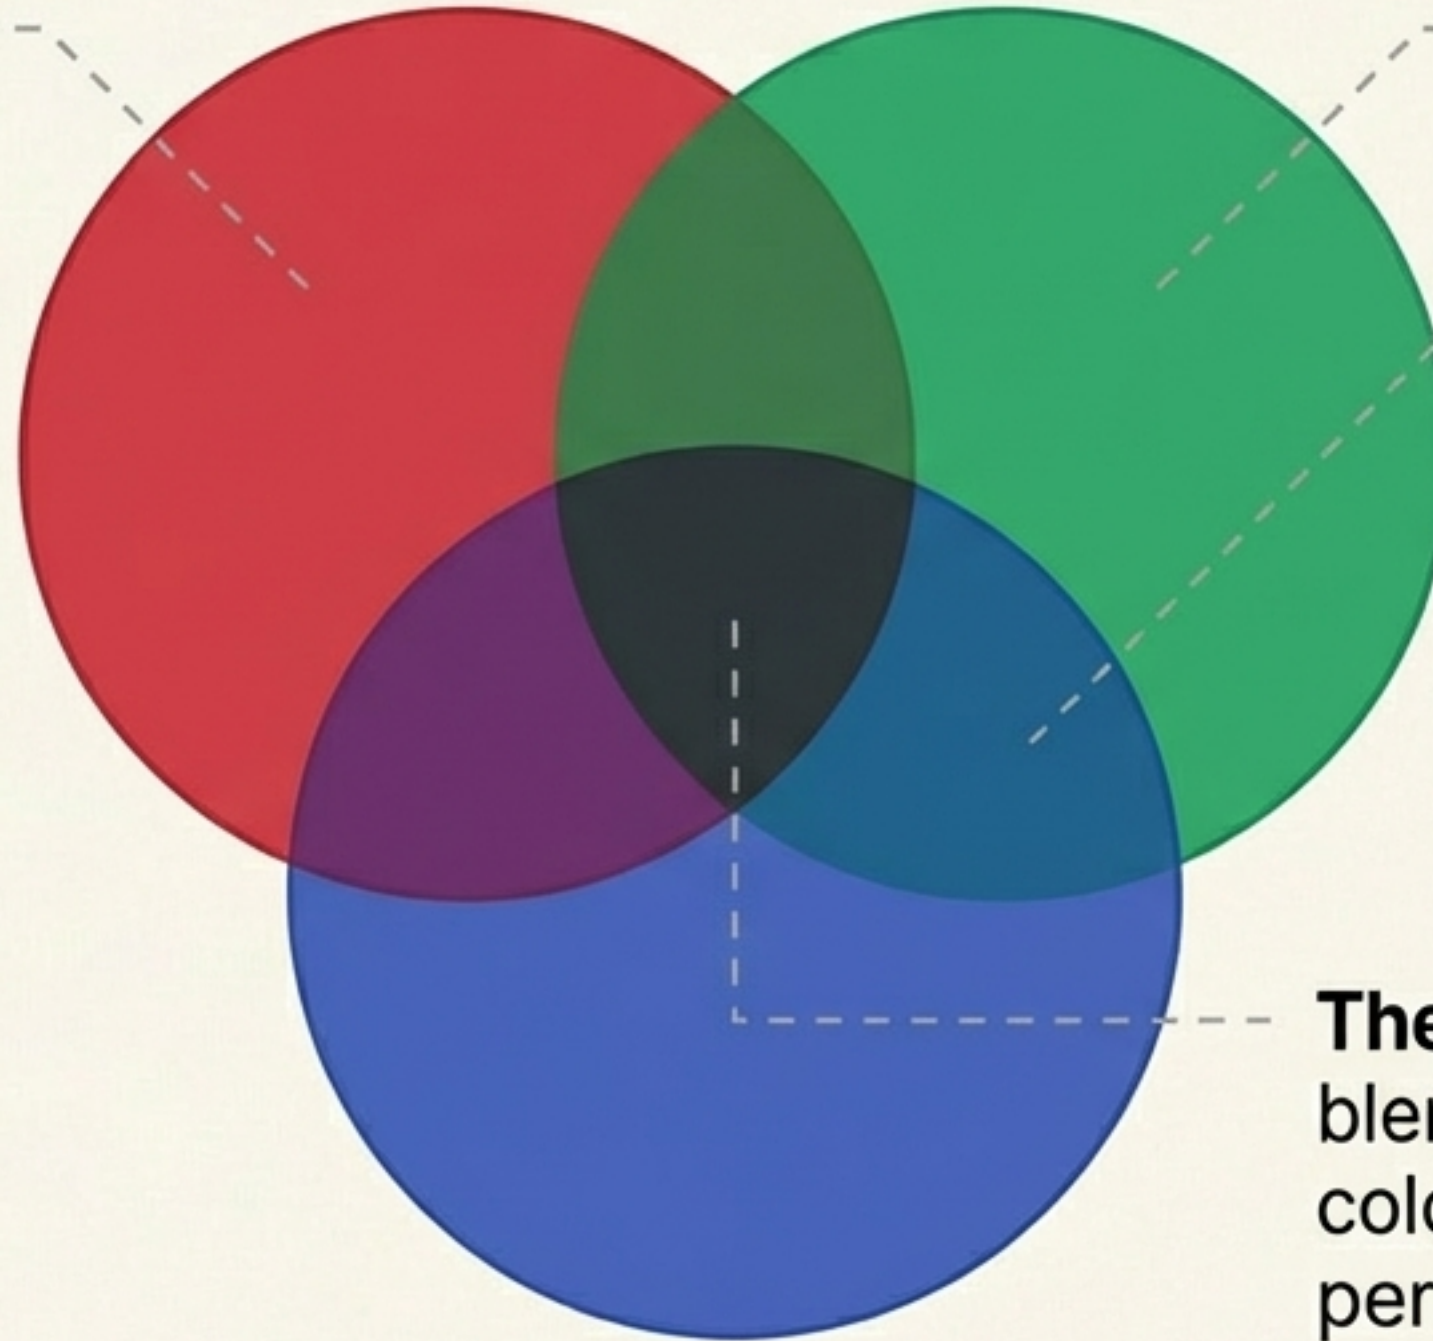

The Inputs:

1 Point earned per validated action.

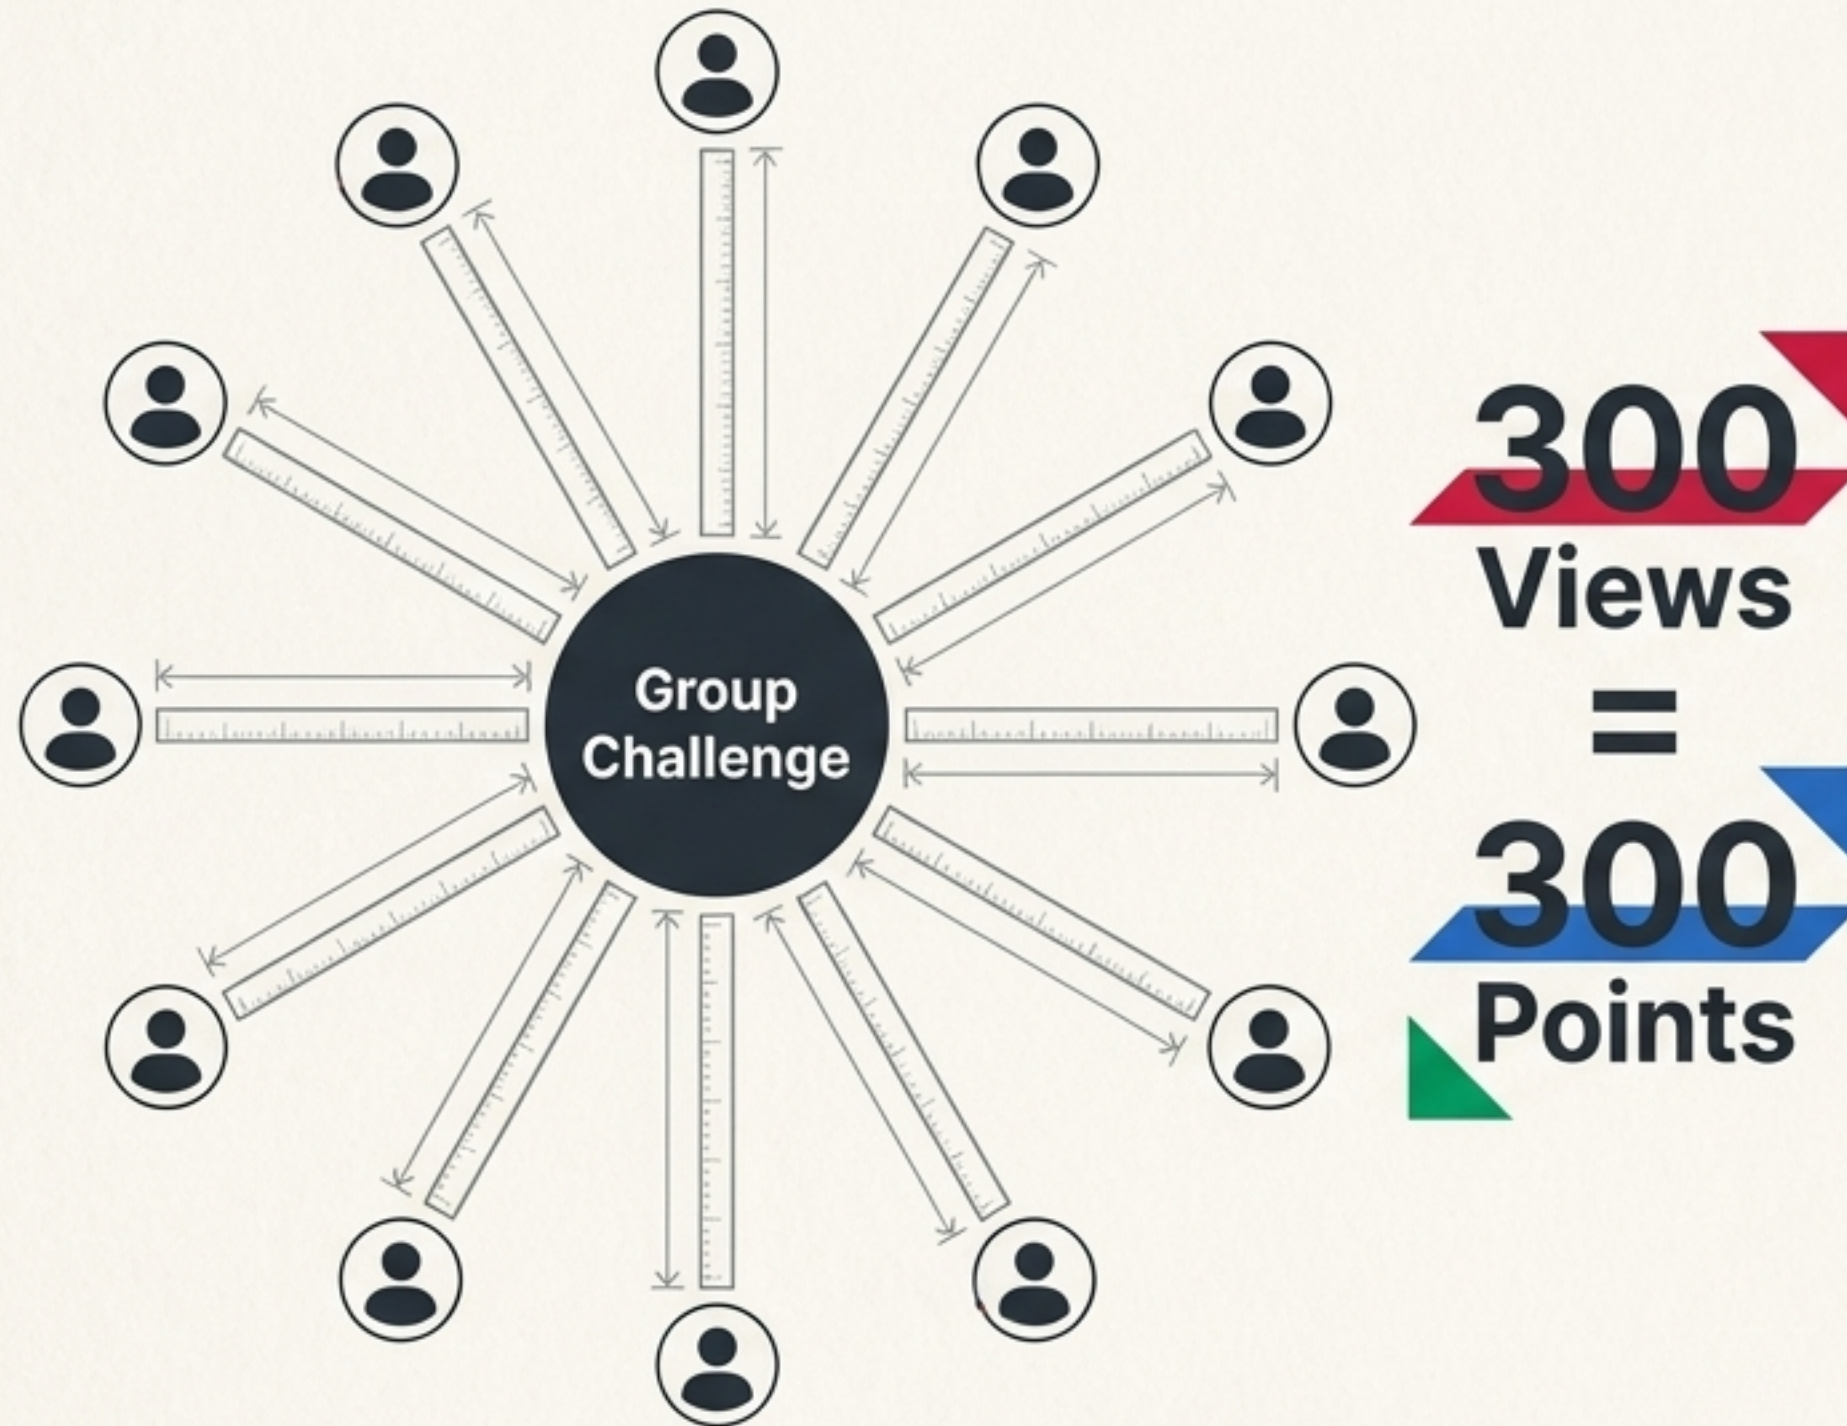

The Channels:

Points channel into three distinct RGB categories based on the specific Path of the action.

The Output: Points seamlessly blend to generate a dynamic, colour identity reflecting your personal journey and values.

Collective Impact: Group Challenges

Registration:

Requires a domain with email service (affordable and accessible).

Reward Yield:

Earn points directly correlated to viewership.

Execution:

Solve challenges recorded by individual users requiring teams (10, 20+ people).

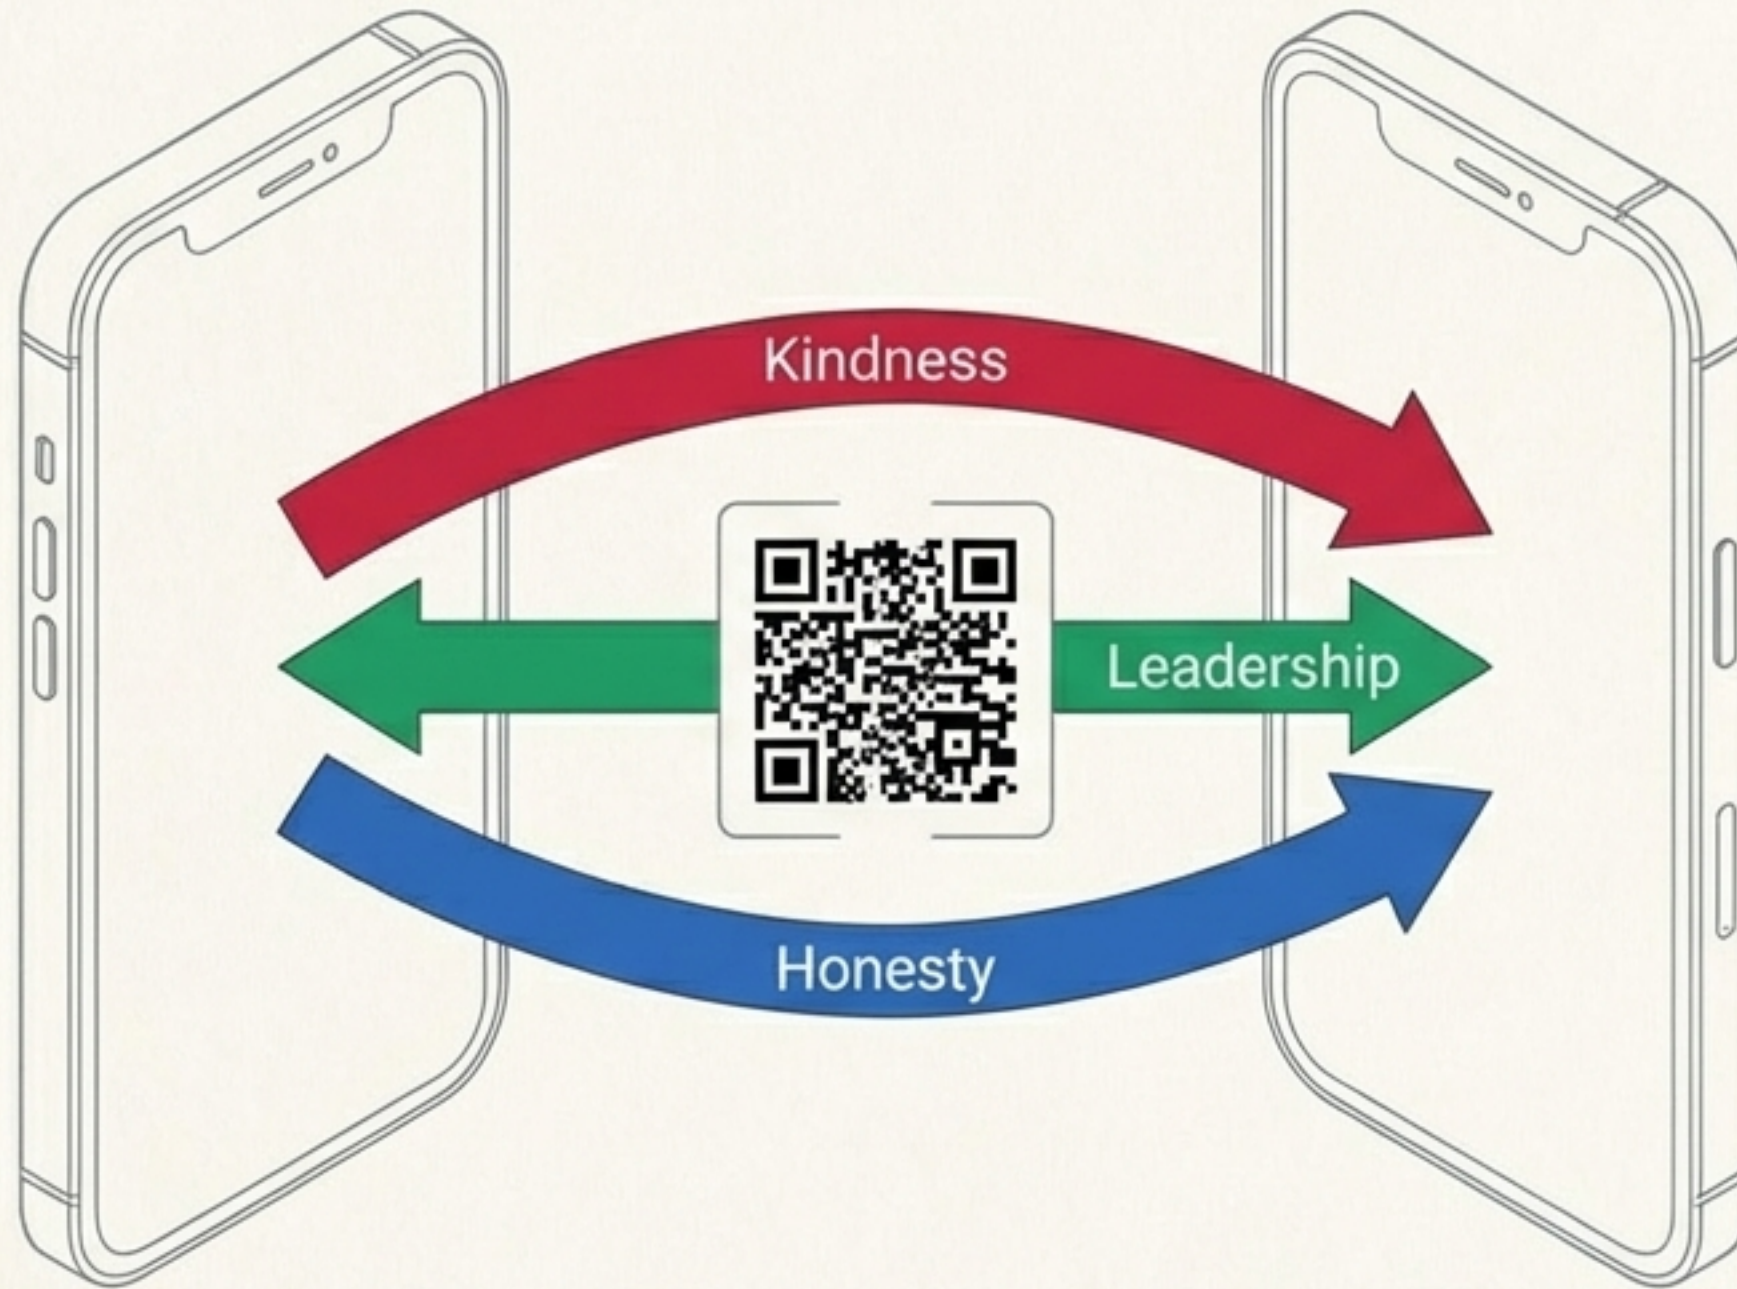

Visibility:

Top groups feature on the STK main page as models of community strength.

Interpersonal Context: In-Person QR Validation

	1. Scan: Instantly read a peer's personal QR code.
	2. Assess: Rate qualities (positively or negatively) based on real-life interactions.
	3. Quantify: Give up to 3 qualities per scan, earning 1 point per quality.
	4. Contextualise: Filter ratings through specific social contexts defined within the app.

The STK Engagement Matrix

	Solo Videos	Group Challenges	QR Scanning
Verification Method	7 Random Users	View Count	Direct Peer Scan
Scale of Impact	Individual execution	Collective/Team effort	Interpersonal (1-on-1)
Point Yield System	1 point per consensus approval	1 point per verified view	Max 3 qualities (3 points) per interaction

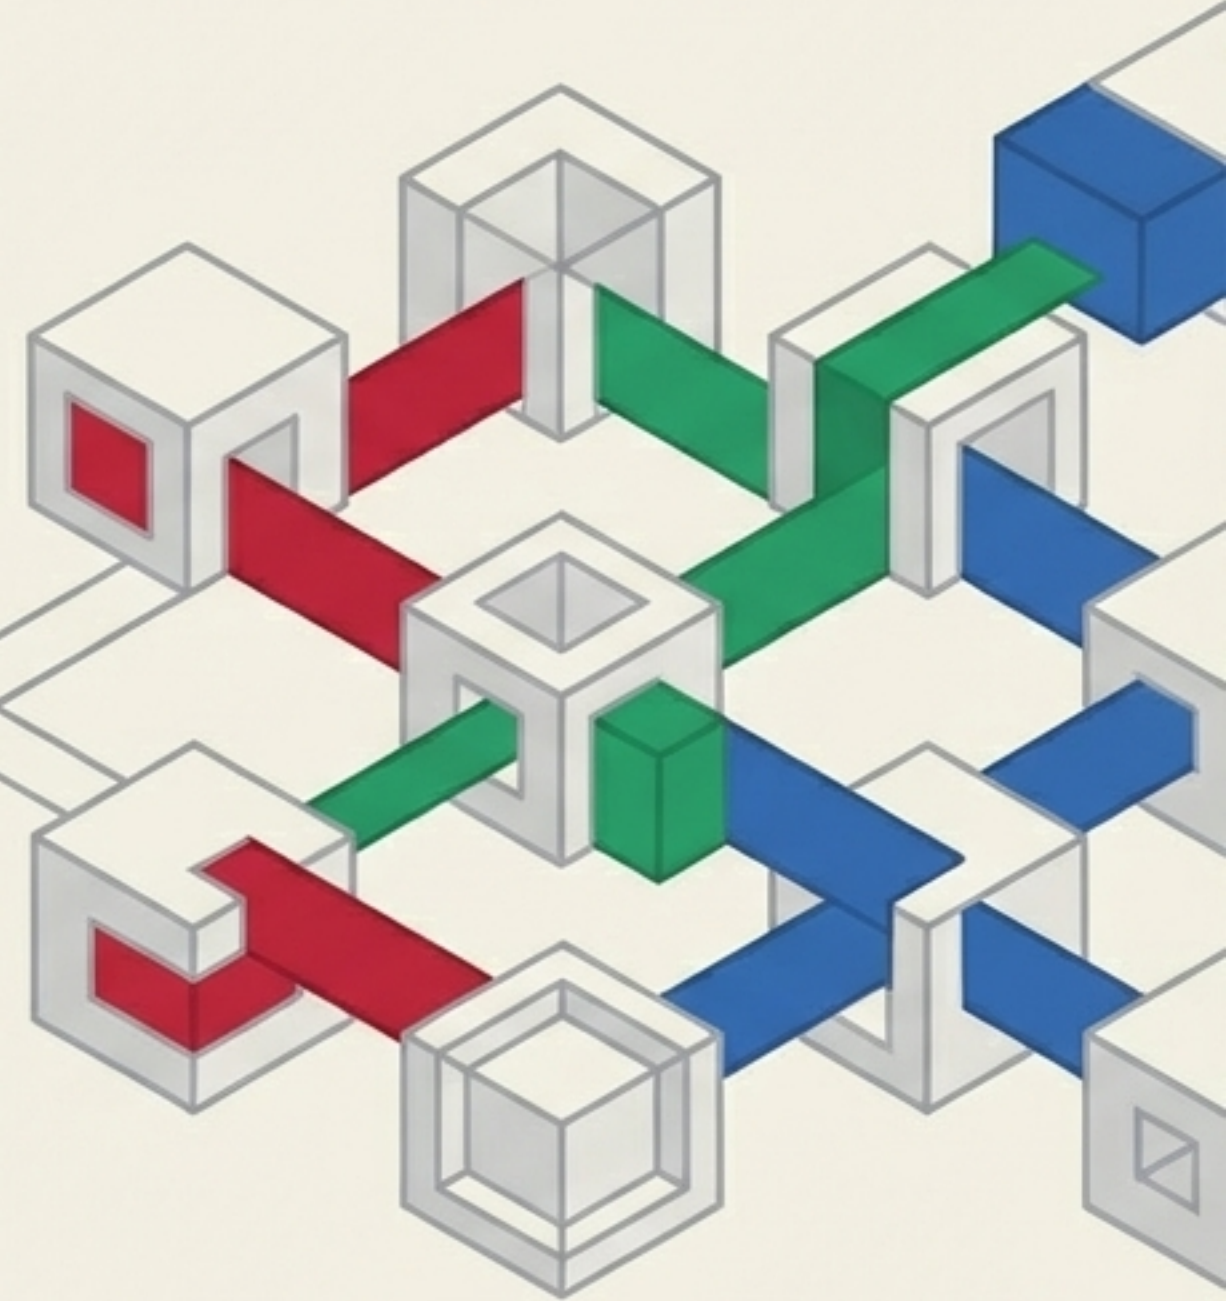

Pooling Inputs into Personal Points

All pathways—solo, collective, and interpersonal—converge to build your holistic social identity. But where does this identity live?

The Bridge to a Decentralised Future

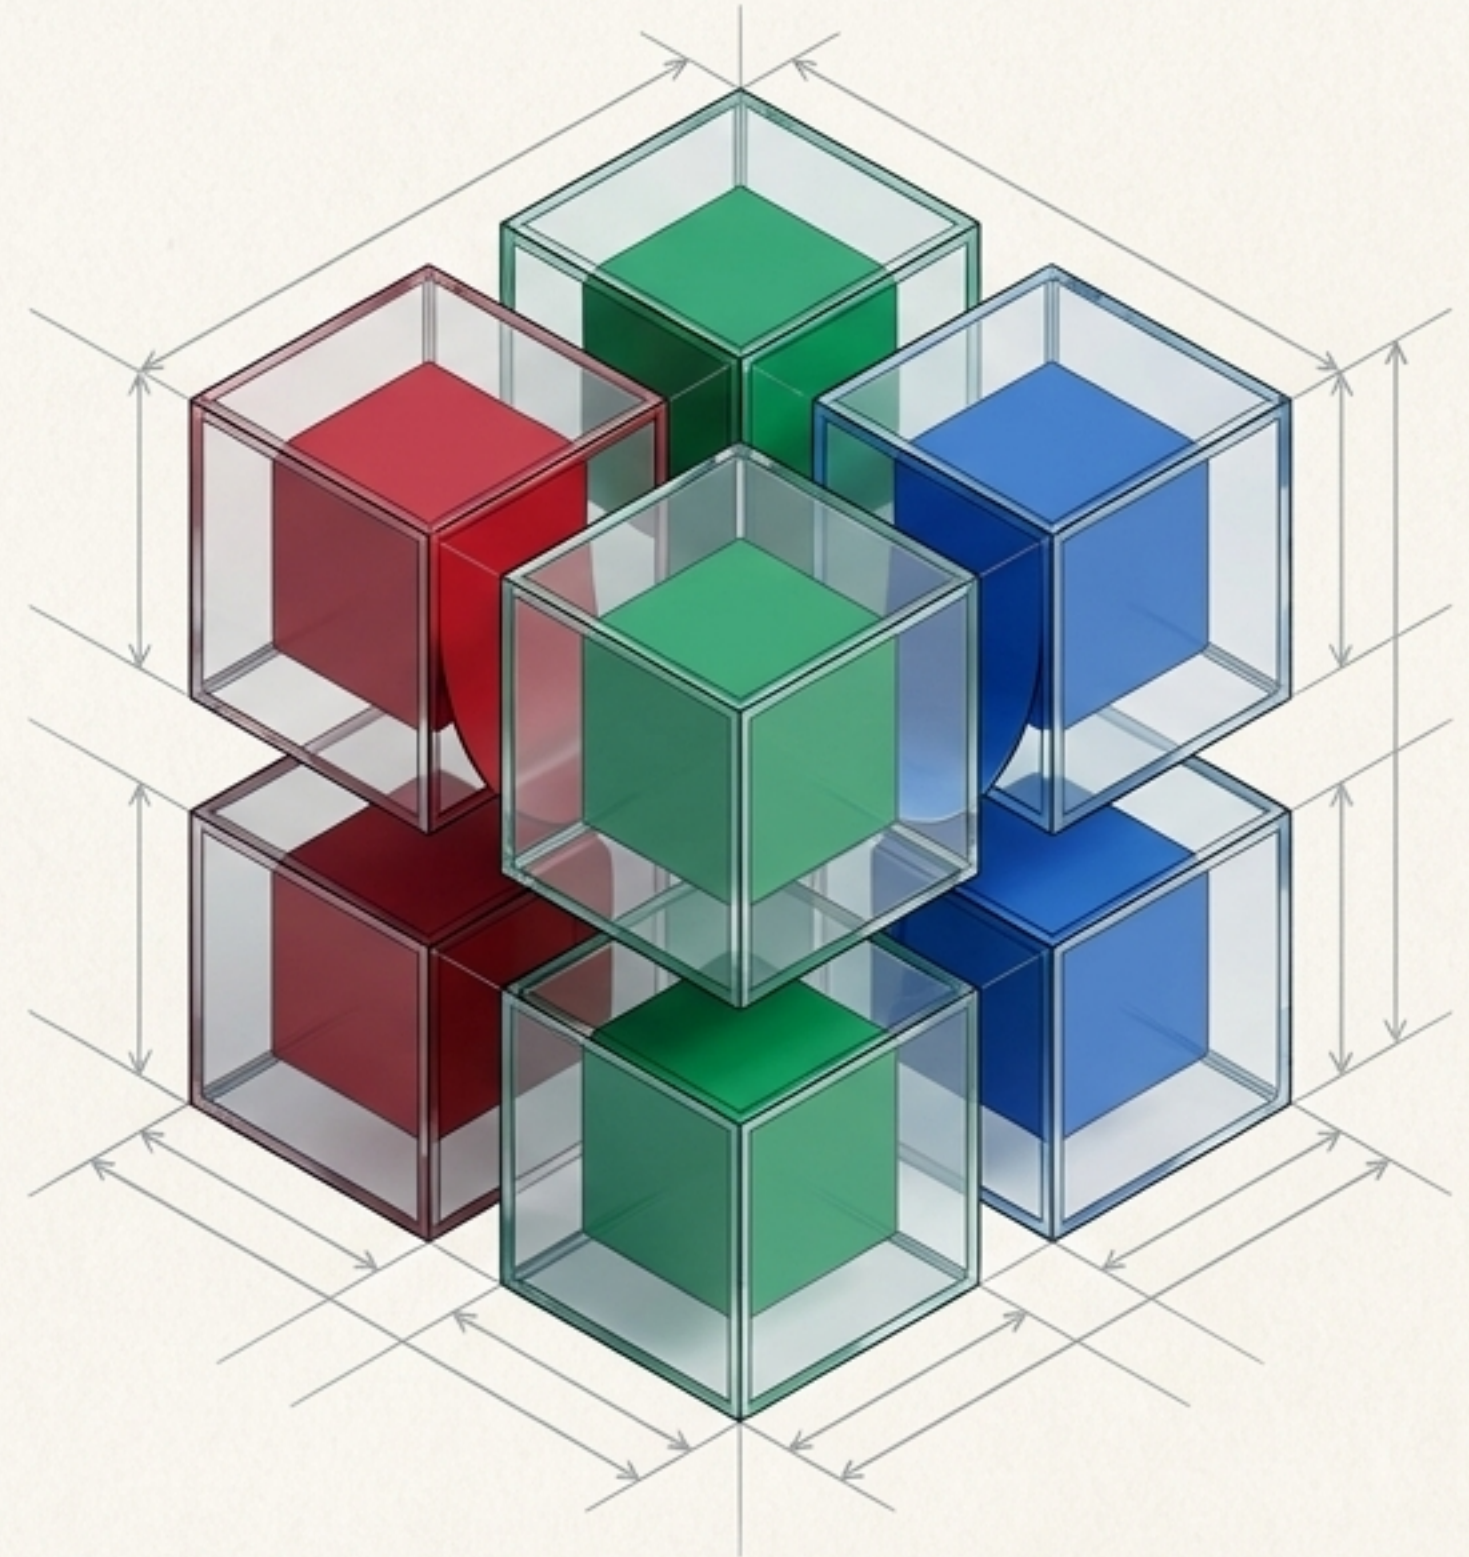

Phase 1 (Today): Utilising accessible Web2 infrastructure (Google/YouTube) to build initial user habits and validate the social model.

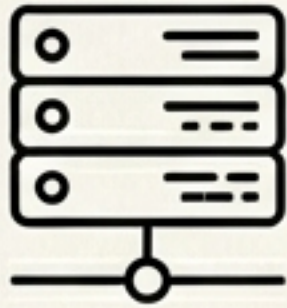

Phase 2 (The Vision): Evolving Personal Points from simple digital markers on a private server into sovereign, user-owned assets.

The Ultimate Vision: Social Proof of Value

- **Immutable Legacy:** Your reputation, creative input, and social impact recorded forever without intermediaries.
- **Sovereign Ownership:** Individuals wholly own their digital legacy.
- **Community Heartbeat:** Transforming social capital into a secure, transparent, and tradable asset.

The Crossroads: Why We Need You

Infrastructure & Smart Contracts

Funding the complex development of blockchain architecture, server maintenance, and data integrity.

The Open Knowledge Base

Ensuring the STK Wiki stays alive as a free, evolving, and accessible resource for all.

Preserving Independence

We remain beholden solely to our community—free from the influence of corporate advertisers and venture capitalists.

Building a bridge to a decentralised future requires more than just code; it requires a foundation.

We are not just looking for donors. We are looking for patrons who believe that a world where value is defined by you, and recorded forever, is worth building.

Your economic support today fuels the reality of tomorrow.
